BERRY  ALLOC

_____ high pressure floors.

Nordic Design. Universal strength.

Say 'hei', the Norwegian hello, to a floor that handles busy family moments, playful pets and everyday chaos without showing a single scratch. Nordic Universal combines an ultra-strong top layer with the strongest wood-based lock, giving you a surface that stays beautiful and steady under every step.

The collection's calm Nordic inspired colours and naturally matt look bring cosiness into your home, creating an inviting space that feels just right. Its spectacular extra long planks (241 x 2410 mm) open up your interior, creating an elegant, expansive look that enhances the feeling of space in any room.

From extra fire safety to extra slip resistance, Nordic Universal is designed to make everyday living easier, safer and more comfortable. You can even choose the installation method that suits your home best.

Beautiful, super strong and thoughtfully made, this is a floor that truly fits any lifestyle.

*Head over to <https://floors.berryalloc.com/en/sources-sustainability> to explore our EPD (EPD-BAC-20220057-CBA1-EN) and other sources of the information above.

The strongest top layer.

Wondering how this floor will deal with lots of footfall, pet paws, toys, office chairs or trolleys? Here's a hint: you won't see a single scratch or mark! The thick top layer of Nordic Universal is built from **four high-quality layers that are pressed together under high pressure and high temperatures**, creating a super-strong protective surface that withstands serious impact and stays mark- and damage-free.

The strongest wood-based lock.

Your floor should feel as good as it looks, which is why our High pressure floors pair **DuoLoc on the long side, our strongest wood-based locking system**, with **NordLoc on the short side** for added stability, giving you a super stable floor. Their clever design makes installation fast and effortless, so your new floor clicks into place from the very first moment. Developed and perfected by BerryAlloc engineers, these compact locking systems fit securely even in challenging areas such as door openings or the final row of your floor. Simply install the floor by angling the planks into place or simply snapping and tapping them together.

Once installed, your floor is perfectly stable giving your home a calm and reassuring feel with every step. You can even dismantle it without damage if you ever want to make changes. But there's more! Its water resistant composition also protects your floor from moisture, bringing lasting confidence and complete peace of mind to your everyday living.

Nordic Universal Eira Oak

Colours that bring Nordic calm into your home.

Bring the calm beauty and cosy warmth of Nordic nature into your home. A palette of natural wood tones, from light and airy to deeper, more characterful shades, creates a serene and welcoming atmosphere that instantly brightens your space. This collection's timeless and balanced designs suit a wide range of homes and interior styles, ensuring your floor remains beautifully relevant over time.

(*) Colour character: discover the science behind the colour character of your floor at www.berryallic.com/harmony-lab.

Extra fire safety for your interior.

Nordic Universal offers a safer choice for your interior. While most laminate and parquet floors only reach the standard Cfl fire class, Nordic Universal achieves Bfl, giving your home a higher level of fire protection and extra reassurance for everyday living.

Nordic Universal Runa Oak

Nordic Universal Rodeo Drive

More grip, less slip, for everyday comfort.

With Nordic Universal, you can enjoy a floor that feels secure and stable underfoot. A selection of decors even comes with extra slip resistance (pendulum test value wet 36+), giving your home added safety and comfort without compromising on style.

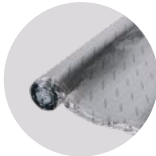

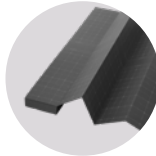

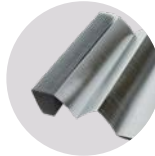

Choose the installation that suits you.

With Nordic Universal, you can pick the installation method that works best for your space. Think of it as a complete, worry free package made just for you.

You can either glue the floor using our wood floor glue or install it with an underlay for a floating installation. A high quality underlay reduces the sound of your steps in the room and the floor below. It's an essential item to keep your floor in great shape and will significantly improve your living comfort once installed.

If you are installing directly on a wooden surface, you can use an underlay without a moisture barrier. For all other subfloors, a moisture barrier is required. This protective layer sits between the existing (sub)floor and your new floor, to protect the floor from moderate amounts of moisture in the existing (sub)floor.

Depending on your project, you can choose one of the following BerryAlloc underlays:

				
	Excellence Plus 10 m ² 2,5 mm SKU SEPLUS10	Excellence Go 60 15 m ² 2 mm SKU 63003600	FoldTec 15 m ² 2 mm SKU 63004044	FoldTec Plus 15 m ² 2 mm SKU 63004045
